

PROJECT CONTROL DATA WAREHOUSE (PCDW) GENERAL INSTALLATION INSTRUCTIONS

DATABASE: ALL

INSTRUCTIONS:

- 1) Read the License. If you accept the license proceed with the remaining steps.
- 2) Download the Project Control Data Warehouse Zip file (package varies depending on your database platform PCDW_00_xxxx.zip) to a 'folder' of your choice or the desktop.
- 3) UnZip the file noting the location of the unzipped files.
- 4) Open your database. (* See note if you are using Access)
- 5) Create a database to hold the PCDW tables (e.g. PCDW_00).
- 6) Open your Database Query engine.
- 7) Select the database you created.
- 8) Open the file: pcdw_00_YYYYMMDD_XXXX.sql or a more recent version of the sql file (in the set of files you unzipped).
- 9) Select the execute button (execution should take a few seconds).
- 10) Look at the tables you created. Only the license table will have any content.
- 11) You are finished.

Note: PCDW documentation of the tables as well as a description of the environment and the PCDW License are included in the unzipped file list.

*Note: If you select the 'Access' option, you don't need to build and populate the table. An Access 'mdb' file has been included and can be opened by Access directly.

Please let us know if there is a script you need that isn't available here. Email us at admin@asaservices.biz
