SOMETHING FOR EVERYONE....

Our Project Reports suck.
Is there a way to build
them cheaper and faster?

Consulting Opportunities?

Tiered of maintaining
complex project reports?

ASA Maintains the Core
(Open Architecture)

REPORTING SYSTEMS

!

Does this mean we could
see wider adoption of our
product?

ACCOUNTING SYSTEMS

ETL

PCDW

ETL

OTHER PM, SCHEDULING SYSTEMS

Is this a volume sales
opportunity?

Can't we push and pull
information?

TOOLS

Isn't this a great way to
promote our tools?

Automated Systems Alliance, Inc.

contactus@asaservices.biz   www.asaservices.biz

WHAT WILL YOU BUILD?

WHAT WOULD YOUR SYSTEM LOOK LIKE?

What if….

What if you could write better custom reports faster and at lower cost?
What if you could change accounting systems and keep your previous detail?
What if you could chuck that old legacy system and its maintenance fees?
What if you weren't bound to specific software vendors?
What if you could merge companies and get immediate consolidated financials?
What if you didn't have to go to a software vendor to get custom reports?

What if the core technology for all this were … well … free?
